

JavaScript Data Types Exercise v1

Background:

Catalyte would like you to demonstrate competency with JavaScript data types. They have provided you with a template project which contains all information. You can access it from your GitLab repository.

Requirements:

1. Complete all requirements in the index.js file of the js-data-types-TEMPLATE project.
2. Check your work by opening up the index.html page in your browser and following the instructions on the screen.
