CSS Exercise 1 v1

Exercise Instructions:

Your client (Catalyte) has requested that a brownie recipe web page have some styling. Below you will find the requirements for the styling they want. Use CSS in order to accomplish all of the minimum requirements for the page.
Leverage the CSS Exercise 1 Template provided to you on GitLab.

Requirements:

1. Set the background of the page to "#CBE3E8"
2. Center the headers (Catalyte Brownie Recipe, Ingredients, Steps, Temperatures).
3. Change the font size of the headers to 60px.
4. Center the image under the "Recipe" header.
5. Change the font size of the paragraph under the "Recipe" header to 30px.
6. Change the font family of the unordered lists to: Georgia.
7. Create a 1px border around the menu (the anchor links to each section).
8. Add the padding in the menu to 6 pixels on the top and bottom, 20 pixels on the left and 30 pixels on the right.
9. Add 6 pixels of margin above and below the menu.
10. Display the menu as an inline-level block container (by changing its display type).

Stretch Requirements (These are optional requirements for additional practice):

1. Give the table and table cells a one pixel solid black border.
2. Change the padding in the table cells to six pixels on the right and left and four pixels on the top and bottom.
3. Make the margin above the headers equal to 0.8 times the height of the header font.
4. Create a #B7CCD1 colored background behind the menu with rounded edges.
5. Center all contents under the "Ingredients", "Steps", and "Temperatures" headers.
